

CARRYMATE[®] Non Slip Panel Grips

Protects your hands, prevents back strain and improves productivity!

Sturdy lightweight alu-construction with self adjusting clamp system.

All sizes of Carrymate[®] Non-Slip Grips come with replaceable rubber pads and a plastic protective sleeve along the cushioned handle; therefore preventing damage to the carried load.

The Carrymate[®] Grips are suitable, not only for heavy duty carrying functions but also for pulling and gripping of difficult to handle materials.

Each grip can lift up to 100 Kilos, and they are sold in pairs. They are suitable for the transport of a variety of natural stone, plywood, building elements, tempered, laminated and insulated glass, PVC, sheet metal, doors, solar modules, etc.

Available as:

- Carrymate[®] 5 (0-80 mm)
- Carrymate[®] Senior (40-120mm)
- Carrymate[®] XL (80-160mm)
- sturdy, light weight alu-construction
- self adjusting clamp system
- each handle carries up to 100 kg
- sold in pairs
- no slip guaranteed for all material thickness (covering all width spans)
- protective sleeve along the handle
